

### **1-Day workshop (2.5hrs) on Number Pattern (For P5/P6 students)**

*Date:* 13 June 18 (Wed)

*Time:* 2.30 p.m. to 5 p.m.

*Venue:* 9 Tampines Grande (walking distance from Tampines Hub)

*Fee:* \$85 per student

Number pattern is a challenging topic as many students have difficulty recognizing the number pattern in the Long Answer Question. This inability to recognize the pattern means that students will be unable to generalize the formula needed to calculate the answer at a higher order.

In this workshop, students will be shown how to recognize the 3 basic types of number patterns. They will also be taught how to modify the generalised formulae from the basic types for different variations of the number pattern.
